R. Youngblood & Co.,  
with Rockworks, LLC

Several challenges were encountered (and overcome!) on this site, due to the intense grade changes and topography. This lake-side bluff property features a custom cedar pergola and patio. By day or night, the space can be enjoyed due to the strategically designed landscape lighting. Lush ground cover and several varieties of perennials and shrubs were planted to soften the large stone walls. The homeowners can bask in beauty at night, warmed by a fire that overlooks spectacular sunsets to the west.
